

Hello, I'm Ladan Sagir Sani

Data Scientists/Analyst

About Me

Results-driven Data Scientist and Data Analyst with over 5 years of experience transforming complex datasets into actionable insights that support strategic business decisions. Skilled in data analytics, machine learning, statistical analysis, dashboard development, and reporting automation to help organizations improve operational efficiency, monitor performance, and drive business growth. Experienced in using data-driven solutions to identify trends, optimize processes, and support predictive decision-making across various business functions.

TOOLS

Data Preparation TOOLS

Data Visualization Tools

Programming / Analytics TOOLS

Technical Skills

1. Data Cleaning & Automation
2. Predictive Modeling & Statistical Analysis
3. Business Intelligence Reporting
4. Database Management
5. Cloud Data Tools
6. Data Analysis with Python
- 7.Exploratory Data Analysis (EDA)
8. Stakeholder Communication & Storytelling

Project Gallery

Ecommerce Sales & Customer Analysis

This project focused on analyzing an e-commerce sales dataset to uncover business insights related to revenue, customer behavior, product performance, and sales trends. The dataset was cleaned and transformed using Excel, analyzed with SQL in MYSQL, visualized through interactive dashboards in Power Bi, and further explored using Python in Jupyter Notebook.

Project #2

Coca-Cola Sales Dashboard

Built a Coca-Cola Sales Dashboard using Microsoft Excel to analyze and visualize sales performance data effectively. The dashboard tracks key business metrics such as total sales, revenue, profit, units sold, regional performance, and monthly sales trends using interactive charts, pivot tables, and KPIs.

Project #3

HR ANALYTICS DASHBOARD

Built an interactive HR Analytics Dashboard using Tableau to analyze and visualize employee data effectively. The dashboard tracks key HR metrics such as employee count, attrition rate, attendance, department performance, recruitment trends, and employee satisfaction through dynamic charts and KPIs.
